Likely bird strikes at home - none

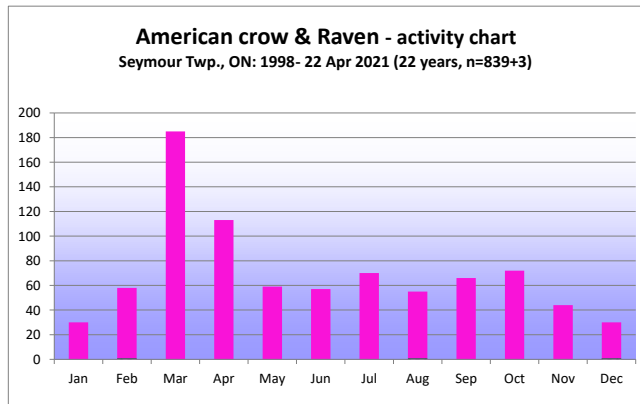

Raven seen just 3 times: 05 FEB 2000, 01 AUG 2005, and (pair) 13 DEC 2017
Updated to 1 June 2014 / 22 April 2021

Note: the chart displays the number of days in a given month in which the crow and raven were observed. This says nothing of total bird numbers: though commonly the crow is seen as a solitary bird, or in small flocks of up to six individuals. Note: observer away much of Mar-May 2016-2019, and in other, shorter periods.
